BIOMEDICAL SCIENCES EXCHANGE PROGRAM

BMEP. Focused on your future in biomedicine

The BMEP (BioMedicine Exchange Program) stimulates progress in biomedicine by creating opportunities for students and alumni to expand and exchange their knowledge internationally.

By encouraging shared thinking and cutting-edge research, the BMEP helps scientists, institutions and industry to advance biomedicines for the common good.

BMEP International Exchange

This unique program accelerates medicine and health science students' careers by sponsoring their further studies at leading institutions in the USA and Canada. This peer-reviewed funding also helps students raise their profile, increasing their chances of early publication in scientific journals.

BMEP Alumni

The BMEP eV brings medical and health science alumni together in international joint projects, with the aim of consolidating and combining their knowledge. Providing an open platform for sharing innovative research, it ensures alumni can take a leading role in influencing biomedicine's role in society.
